ABOUT ME

A team orientated, solutions based wholistic thinker and problem solver. Seeker of active communications vertically and horizontally to insure a cohesive workflow for my team, and assure a quality product is delivered. Performs research and conducting analytics in order to be subject matter expert. The values of enthusiasm, active listening, team moral, and reciprocity are metrics I contribute as a force multipliers to my peers on a daily basis. Extensive background in customer service and collaborations

EXPERIENCE

Ruby on Rails Developer Intern

San Diego Startup Map

June 2023 - Current

- Expedite and support development team in progressively updating and upgrading San Diego Startup Map's application from Rails 4.2 --> 7.0.0.
- Managing and parse through legacy code base and prime development environment for code migrations.
- Verifying completed test coverage prior to migration.
- Post migration, cross examining for deprecated features, GEM dependencies while assuring the product owner's intended application functionality and test coverage stays true to the original design
- Strong understanding of Agile methodology. Proficient in frameworks like Scrum and Kanban. I excel at collaborating with cross-functional teams, managing product backlogs, conducting sprint planning, daily stand-ups, sprint reviews and retrospectives, to ensure effective progress tracking. With a focus on continuous improvement.

Software Engineer LEARN Academy

March 2023 - Current

- Implement 400+ hours of direct of coding experience
- Produced user- friendly full stack applications with test driven development practices with JEST, and RSpec
- Build secure MVC databases with Ruby on rails, and quality responsive UI with React frameworks
- Achieved working knowledge of Functional Programming, Object Orientated Programming, Relational Databases, and best practices for documenting and production of code

Geospatial Intelligence Imagery Analyst

Minnesota Army National Guard

January 2018 - Current

- Conduct analysis and exploitation on satellite imagery and data collected from fixed wing assets
- Produce products and brief intelligences assessments to commanders and higher ranking officers. Assist in corroborating intelligences to produce fire missions and identification of high value targets
- Team lead in research and analysis collections. Provide support for joint force efforts in counter terrorism mitigation in Africom
